

EPTA FOOD DEFENCE

**an innovative antibacterial system
for MISA refrigerated cold rooms**
that was devised to improve the quality
and healthiness of products.

It is able to prevent and actively combat many species of bacteria, including the best known dangerous varieties.

The activity of the treatment **is permanent, 24 hours a day, 7 days a week: the treatment doesn't need to be regenerated and lasts for the entire service life of the cold room.**

The film is suitable for contact with foodstuffs and substances for personal use in conformity with D.M. 21 March 1973 and as amended and EU Directives 78/142/EEC, 80/766/EEC, 82/711/EEC, 85/572/EEC, 90/128/EEC, 92/39/EEC.
